Correlation among sites of limited proteolysis, enzyme accessibility and segmental mobility (FEB 04375) *J. Novotný, R.E. Bruccoleri* 185

Interaction of myelin basic protein with the different components of the ATP,Mg-dependent protein phosphatase system (FEB 04384) *J.R. Vandenheede, J. Van Lint, C.Vanden Abeele, W. Merlevede* 190

Cholinergic receptors regulate a voltage-insensitive but Na^+-dependent calcium influx pathway in salivary acinar cells (FEB 04385) *A.P. Morris, C.M. Fuller, D.V. Gallacher* 195

Cloning and sequence analysis of the human brain β-adrenergic receptor: Evolutionary relationship to rodent and avian β-receptors and porcine muscarinic receptors (FEB 04390) *F.-Z. Chung, K.-U. Lentes, J. Gocayne, M. Fitzgerald, D. Robinson, A.R. Kerlavage, C.M. Fraser, J.C. Venter* 200

A 40 kDa inhibitor of protein kinase C purified from bovine brain (FEB 04386) *F. Hucho, H. Krüger, I. Pribilla, U. Oberdieck* 207

Modulation of superoxide dismutase by electron donors and acceptors (FEB 04392) *N.V. Gulyaeva, A.B. Obidin, B.S. Marinov* 211

Removal of 33 kDa extrinsic protein specifically stabilizes the $S_2Q_A^-$ charge pair in photosystem II (FEB 04388) *I. Vass, T. Ono, Y. Inoue* 215

A new mutation in the gene coding for the herbicide-binding protein in *Chlamydomonas* (FEB 04391) *U. Johanningmeier, U. Bodner, G.F. Wildner* 221

Radioactively labeled ether lipids by biotransformation of symmetrical alkylglycerols in cell suspension cultures of rape (FEB 04387) *N. Weber, H.K. Mangold* 225

Murine erythroleukaemia cells (Friend cells) possess high-affinity binding sites for erythropoietin (FEB 04404) *P. Mayeux, C. Billat, R. Jacquot* 229

Apparent identity of cerebral tyrosylsulfotransferase activities using either a cholecystokinin derivative or an acidic amino acid polymer as substrate (FEB 04389) *F. Vargas, J.-C. Schwartz* 234

Direct evidence for the participation of pyruvate in *N*-hydroxylation of lysine (FEB 04378) *E.W. Szczepan, D. Kaller, J.F. Honek, T. Viswanatha* 239

Sequence identity between a lysine-containing peptide from *Leuconostoc mesenteroides* glucose-6-phosphate dehydrogenase and an active site peptide from human erythrocyte glucose-6-phosphate dehydrogenase (FEB 04405) *M.M. Bhadbhade, M.J. Adams, T.G. Flynn, H.R. Levy* 243
